FRAME FEATURES

Scott Fit System

The patent pending SCOTT FIT SYSTEM is a mechanical adjustment located at the bottom of each side of the goggle allowing you to choose between four positions providing a customized face and nose fit.

Over The Glasses (OTG)

OTG Goggles offer protection from the elements and an optimized fit for people requiring prescription glasses

Revolutionary Air Management System (RAM)

RAM is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating "swirling air" and fogging.

Helmet Compatibility

Scott goggles are engineered to engage flawlessly with a variety of helmets.

Adjustable Nose Guard

Exclusive to SCOTT, the Adjustable Nose Guard on the Tyrant adjusts in three different positions allowing riders to configure the guard exactly to their liking.

FACE FOAM CONSTRUCTION

NoSweat 3.2 Face Foam [Patent Pending]

NoSweat 3.2 Face Foam system channels sweat away from the face while relieving pressure from the nose to provide the most advanced sweat protection and comfortable fit on the market. The first foam system integrates the proven 3-layer NoSweat foam across the top half of the goggle. The first layer channels sweat away from the face; the middle layer absorbs sweat; the third fleece layer creates a comfortable fit and seal. The second foam system bonds 2-layer foam to the lower half of the goggle. The first layer of high volume contour molded foam provides cushioning and absorbs sweat. The second fleece layer creates a comfortable fit and seal.

Multi-Layer Face Foam

Scott's Multi-Layer Face Foam incorporates two layers of foam and one layer of fleece, delivering a comfortable performance fit. The first layer features maximum sweat retention properties and provides cushioning from the frame while the second layer ensures a precise comfortable face fit. The third layer provides a comfortable barrier between the goggle and rider's face.

Hypoallergenic Super-Soft Face Foam

Scott's Hypoallergenic Super-Soft Face Foam provides a precise fit around facial features while sealing out the elements. This single density foam is comfortable and has moisture retention properties.

Composite Snow Face Foam

Composite Snow Face Foam is designed specifically to combat winter elements. The oversized face foam completes the helmet/eye-port seal, reducing cold spots on the face. This 3-Layer Composite foam places a super soft fleece layer against the face combined with 2 outer layers engineered to form a high speed wind barrier and precise fit.

LENS TECHNOLOGY

SCOTT Precision Optics

SCOTT Precision Optics is a quality label which stands for premium materials and innovative manufacturing techniques. This unique combination enables us to offer distortion free, UV protected, high performance lenses of the best quality.

Scott OptiView

Scott OptiView lenses are manufactured in Europe and adhere to the strictest testing standards. Scott's proprietary injection molding process and hard coat treatment guarantees that every OptiView lens is optically correct.

Scott TruView

Scott TruView lenses are lightweight and block 100% of harmful UV rays. TruView lenses pass Scott's strict testing procedures delivering high-quality, performance lenses in select SCOTT goggles.

100% UV Protection

All Scott lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.

No Fog™ Anti-Fog Lens Treatment

Scott lenses undergo a permanent No Fog™ treatment process to prevent condensation and fogging.

Air Control System (ACS)

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

Asymmetrical Tearoff Pin System

The Scott WORKS asymmetrical tearoff pin system is a set of clear tearoff pins where one is a static pin and the other is an oval swivel that allows the rider to micro adjust the tearoff tension using a flat head tool. This adjustment helps perfect the fit and pull away tension per the conditions and rider's preferences. In addition these pins can be easily removed to accommodate our WORKS film canisters.
